

Setting Up the ClimbSystem Plugin

Assuming a C++ ThirdPerson Game UE version 5.6

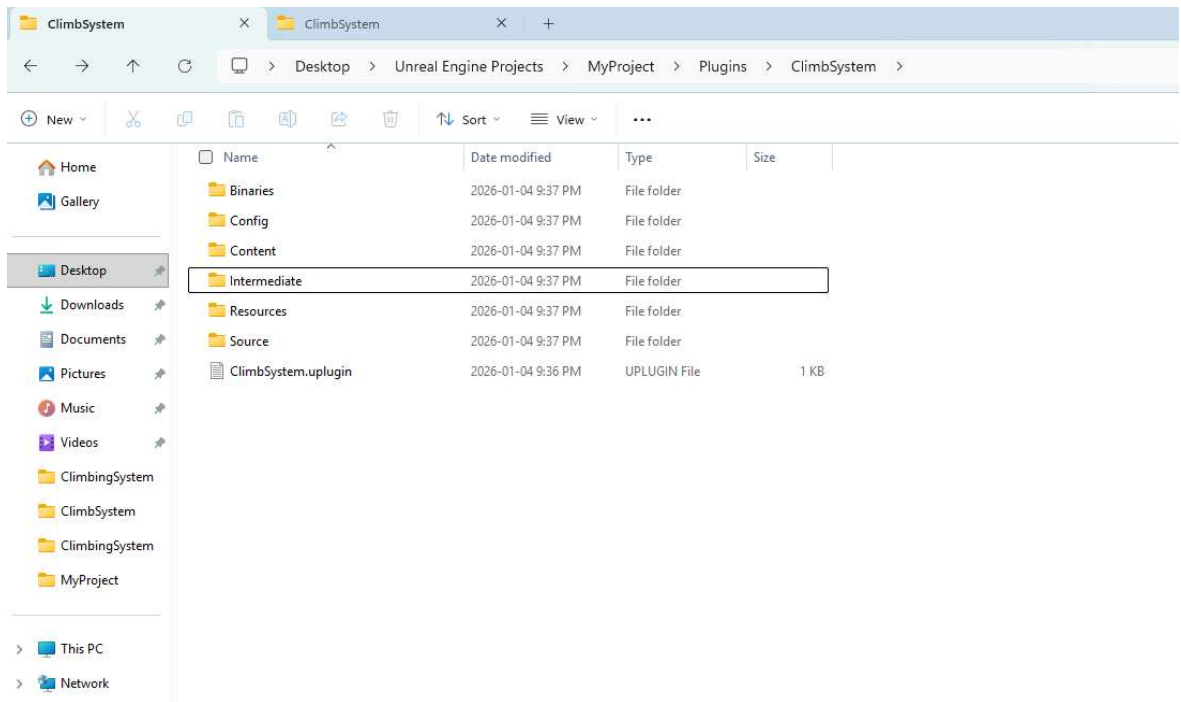

1. Create a Folder Named Plugins in the Project Source Folder

	.vs	2026-01-04 9:10 PM	File folder	
	Binaries	2026-01-04 9:39 PM	File folder	
	Config	2026-01-04 9:15 PM	File folder	
	Content	2026-01-04 9:14 PM	File folder	
	DerivedDataCache	2026-01-04 9:10 PM	File folder	
	Intermediate	2026-01-04 9:39 PM	File folder	
	Plugins	2026-01-04 9:37 PM	File folder	
	Saved	2026-01-04 9:33 PM	File folder	
	Source	2026-01-04 9:09 PM	File folder	
	.vsconfig	2026-01-04 9:09 PM	VSCONFIG File	1 KB
	MyProject.sln	2026-01-04 9:09 PM	Visual Studio Solu...	171 KB
	MyProject.uproject	2026-01-04 9:09 PM	Unreal Engine Proj...	1 KB

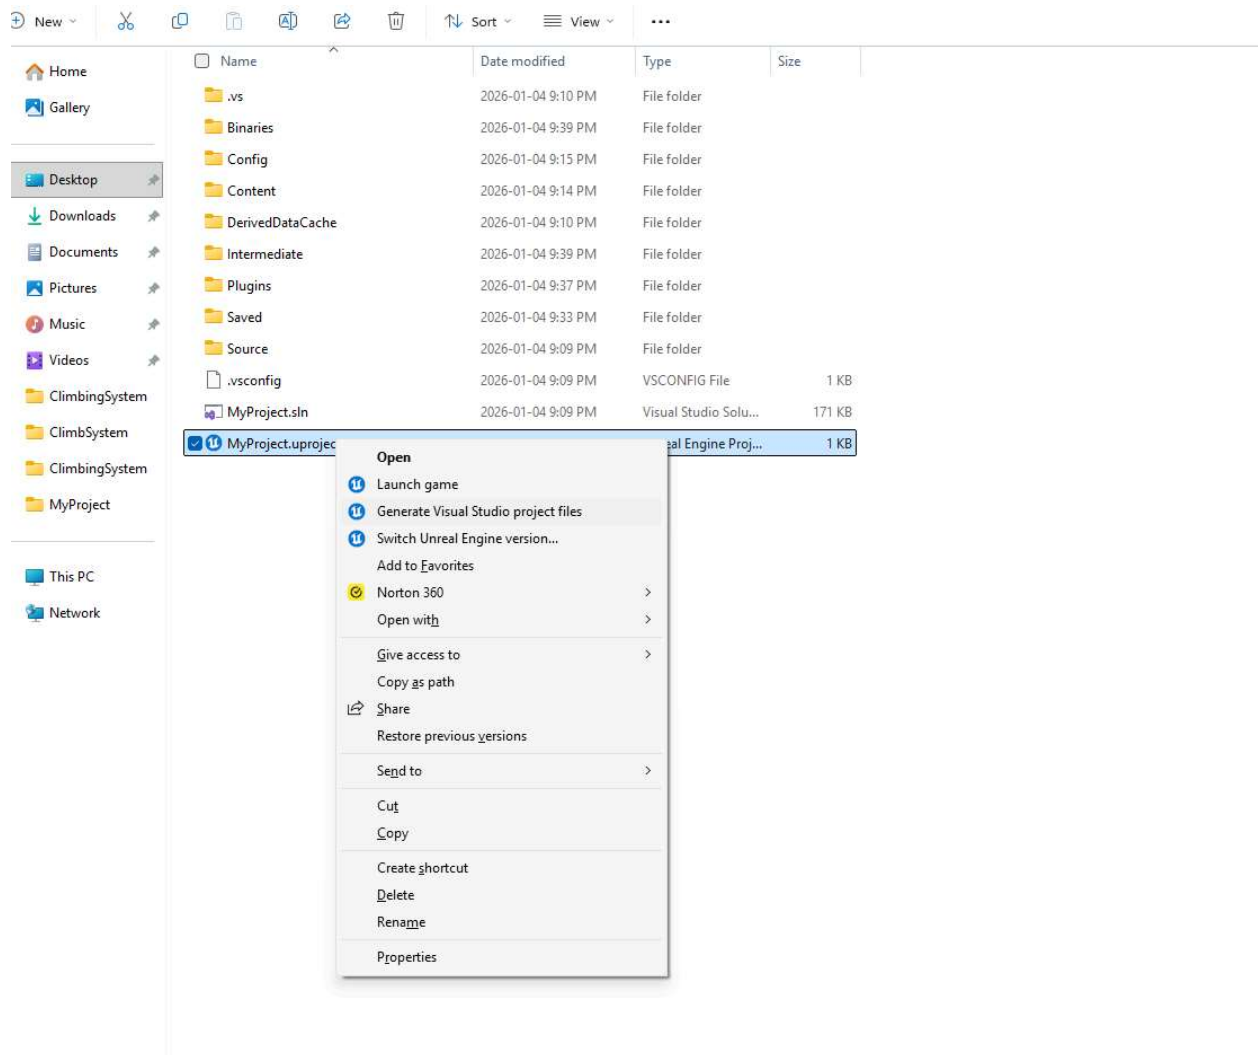

2. Paste the Plugin inside it

3. Make sure Intermediate and Binaries are deleted inside the ClimbSystem Folder:

4. Regenerate Visual Studio projects files

5. Opening the .sln and rebuild
